

A BRIGHTER START, ONE SMILE AT A TIME.

Happy Teeth Smart Kids for Schools brings preventive dental care straight into Nepal's classrooms. Because healthy smiles begin early, and they begin where children spend most of their day.

For over a decade, The Shine Dental Clinic has helped families across the Nepal and beyond raise confident, cavity-free children. Program extends care beyond our chairs to every child, parent and teacher in your school.

HAPPY TEETH, *Smart kids*

School Oral Health Program from The Shine Dental Clinic, helping children grow up healthy, confident, and ready to **Shine**.

HEALTHY
SMILES TODAY,
BRIGHTER
FUTURES
TOMORROW.

Our School Program Includes

Every visit gently blends oral health care with classroom learning designed for the way children actually engage, by a team trained in dental child psychology.

01. Teacher & Parent Workshops

Short, practical sessions on spotting early signs and building daily routines at home.

02. Interactive Classroom

Age-appropriate stories, demos and games that teach brushing, flossing, healthy habits and smart food.

03. On-site Dental Screening

Pediatric dentists gently screen every enrolled child and send a confidential report card home for parents.

04. Cavity-Free Classroom Care

With regular checkups to guide the way, we keep classrooms cavity-free every single day!

HAPPY TEETH, SMART KIDS

Why it Matters

Academics

- 60-90% of school children worldwide suffer from dental caries (tooth decay), making it one of the most common childhood diseases.
- Don't let a toothache steal your school day. In our clinic, children lost 40,580 hour in 2082 alone.
- Children are 1.4x more likely to miss school due to dental diseases let alone other

Confidence

- Visible decay causes children to hide their smile.
- Bad breath and discolored teeth affect social interactions.
- Healthy teeth give children the confidence to speak and laugh freely.

Speech Development

- Missing or decayed teeth make it harder for children to pronounce sounds and words clearly.
- Poor oral health can affect speech clarity, limiting how confidently children communicate and participate in class.

and much more...

Stronger Smiles.) STRONGER SCHOOLS.

Healthier Students
